PART 1. LEADERSHIP OF A SOFTWARE DEVELOPMENT TEAM

1. Please describe any experience you have had leading a group or a team:

I use to be a sanitation specialist backup leader at Peperidge Farm Plant in UTAH State. In my role, I make job schedule for people in the team. I am responsible for the thing happen unexpected in the factory such as: Food contamination, and allergy. I also perform a job check up for the people in the team after they are done with their daily job make sure everything is clean and ready for the product to run.

2. Please describe your software development experience, including in classes, and especially any experience outside of class:

I experienced software development in class which used the technologies as follow: Angular, Django, MongoDB, Mongoose, and Express.

3. List the best reason why I should appoint you as one of the team leaders in this class:

The background experience in the Food Industry, though there is no relation to the software development, but I know how to arrange time, so I think it is a good fit for the software development iteration plus some technologies skill I have as listed above.

PART 2. MEMBER OF A SOFTWARE DEVELOPMENT TEAM

1. Please describe your most important technical skills that you think are relevant to software development:

My important technical skills that are relevant to software development are: Version Control and makefile.

2. Please describe your most important experiences as a team member. You needn't limit yourself to software development teams, though that is certainly relevant:

I used to be in a team for one of my class developed an application software using Django framework .

3. What is the best reason why a team leader should choose you to be on her or his team?

I know some technical skill as stated above and plus programming languages such as: C, C++, Java, JavaScript, Python, HTML, and CSS. Base on these skills, I am in a good shape for a group's flexibility.
